

FuelTech

The image features a black and white photograph of a car's interior, specifically the dashboard and steering wheel area. A red rectangular overlay is positioned horizontally across the middle of the image. On the left side of this overlay, there are seven vertical red bars of increasing height from left to right. To the right of these bars, the text "FuelTech" is written in a white, italicized, sans-serif font, with a thin white underline beneath the word "Fuel".

PERFORMANCE IN YOUR HANDS!

FuelTech is an international company specialized in developing and manufacturing state of the art performance engine management systems. The company's elite staff, always keeping a grip on the forefront of technology available, guarantees top notch quality and constant innovation.

The product line's greatest advantage is its overall simplicity, from its painless installation to real time tuning in just hours, depending on the application. Our FT series ECU's built-in interface is a complete set that allows the user to have full control of the engine without the need of a PC, emphasizing the on the spot, do it yourself concept.

FuelTech's craftsmanship and technology is built on extreme performance and proof comes from where it matters, the race track. Excellent record breaking track results on a wide variety of racing classes such as Sportsman, Pro Drag, Circuit, Off-Road, Rally, Motorbike and Marine applications testify our commitment to attain the best results, everywhere we compete. Developing and designing high performance products since 2003, FuelTech will surely have a product to fulfill your needs.

Over the past few years we have worked extensively with the US market to prepare our latest EFI system, the FT600, for release in the USA. A team of racing experts worked hand in hand with our in-house staff of software engineers, hardware engineers and designers to help us deliver a product that could be used easily on anything from a street car, bike, jet ski, etc. all the way up to a 5000+hp twin turbo alcohol Pro Mod combination! We made several hundred dyno pulls, many trips to the states and used countless R&D hours to end up with an incredible feature-rich product that we are extremely proud to release to our customers.

SUMMARY

- 03 ECUS
- 15 CONTROLLERS
- 19 METERS AND LOGGERS
- 24 IGNITION
- 27 SENSORS AND ACCESSORIES
- 34 FT APPAREL

ECUS

Engine management systems to control fuel and ignition. Built-in dashboard, power management and a lot more! Fits cars, boats, motorcycles, jet-skis, etc...

FuelTech FT600

FuelTech FT600, the
next level in electronic
fuel injection!

POWER ECU FT

Extreme PERFORMANCE

FT600 is FuelTech's most advanced engine control and monitoring system. It is an ECU, dashboard, data acquisition and power management system.

IP67 waterproof
aluminum chassis

10 LEDs for use as
progressive Shift Light

4 configurable side
LEDs that can be used
as a status indicator for
any input

68 pins automotive
connectors

32 configurable
outputs

20 configurable
inputs

Color touchscreen
TFT – non reflective

- ECU & Dashboard in a single product
- Up to 4 customizable dashboard screens available
- Sequential injection for up to 32 injectors
- Sequential ignition for up to 16 coil on plugs

- New 2-step hi-res power management strategy
- G Meter and Gyro
- Drag Racing features
- Power management
- Closed Loop O2 Control
- Nitrous control

- Customizable splash screen
- Datalogger
- User-friendly interface
- USB
- Custom emblem
- Custom flash drive
- And much more!

ECU I

FuelTech **EVERYWHERE**

Up to 4 customizable dashboard screens available

Without Harness: #5384
With 10ft blank harness: #5385

FT500LITE

POWER FT
ECU I

All FT500 features without the touchscreen!

- Transform your FT500LITE into a FT500 anytime by purchasing the screen upgrade
- Active traction control
- Rotary and piston engine compatible (2, 3 and 4 rotors, 1 to 12cyl)
- Sound alerts
- System can be programmed to use any sensor (analog 0-5V w/ 1k pullup selection, frequency digital or digital switch)
- Diagnostics panel, electronic throttle and ignition calibration on FTManager
- Idle speed control by step motor, timing, electronic throttle or solenoid valve
- Active traction control

Update your ECU with USB

256 channel internal Datalogger

Without Harness: #3922
With 10ft blank harness: #3923

Without Harness: #3315
With 10ft blank harness: #2639

Update your ECU with USB-CAN Converter¹

Color touchscreen TFT – non reflective

19 channel internal Datalogger

FT350

- 4.3" Color touchscreen
- Distributor type and crank trigger ignition control
- 5 ignition outputs to control wasted spark or coil on plug systems
- Idle speed control by timing or by solenoid
- 19 channel Internal Datalogger¹

¹ FuelTech USB-CAN Converter needed (sold separately)

Without Harness: #3318
With 10ft blank harness: #2643

Update your ECU with USB-CAN Converter¹

Color touchscreen TFT – non reflective

24 channel internal Datalogger

FT400

- 4.3" color touchscreen
- Distributor type and crank trigger ignition control
- 6 ignition outputs to control wasted spark or coil on plug systems
- Idle speed control by timing, step motor or solenoid
- Electronic throttle control (drive-by-wire)¹
- Fuel table tuning aid²
- Closed loop lambda control²
- 24 channel Internal Datalogger³

¹ Not compatible with all electronic throttle bodies

² FuelTech WB-O2 Meter Nano needed (sold separately)

³ FuelTech USB-CAN Converter needed (sold separately)

Without Harness: #3321
With 10ft blank harness: #2815

Update your ECU with USB

128 channel internal Datalogger

POWER FT
ECU I

FT500

- Sequential fuel injection for up to 20 injectors
- Individual fuel and ignition trim
- Customizable maps resolution (up to 1024 cells)
- Closed Loop O2 Control
- Advanced Nitrous Control
- Integrated BoostController
- Live tuning through the dashboard or PC software (via FTManager software)
- 2D or 3D tables for fuel and ignition maps
- Up to 8 ignition outputs to control wasted spark or coil on plug systems
- Editable sensors parameters allows compatibility with OEM sensors, including parallel connection with OEM ECU

a. 1 - By timing; 2 - ON/OFF vale; 3 - Step motor; 4 - Electronic throttle; 5 - PWM valve.

b. Our new 2-step limiter utilizes timing retard and ignition cuts to spool turbos faster and make more boost. This new smoother control strategy also helps to prevent blower belts from snapping and premature wear on gear driven supercharger setups.

c. Allows compatibility with OEM sensors (including parallel connection with OEM ECU).

d. Channels are customizable, i.e., exhaust back pressure, suspension travel, exhaust gas temperature (requires EGT-8CAN or FuelTech ETM-1), fuel tank level, etc.f. Allows the use of the stock MAP sensor on a "plug and play" installation.

e. Mandatory use of a Peak and Hold driver.

f. Usually used to control high impedance injectors with no external driver needed (they also can be configured as auxiliary outputs).

g. Usually used for ignition control (they also can be set up as injector outputs or auxiliary outputs).

h. When needed, blue output #6 can be used as ignition output #5

i. Usually used for stepper motor, electronic throttle, MSD/M&W and other ignitions activated by 12V.

k. For PowerFT line, the recording time was measured with 24 channels and 25Hz, for the rest of the line it was at 2Hz with the maximum number of channels.

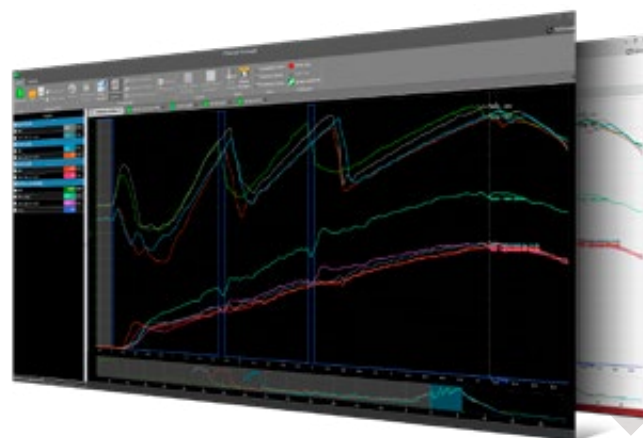

l. PowerFT line use a common mini USB cable (included). The rest of the line demands the FuelTech USB-CAN Converter (sold separately).

FTMANAGER

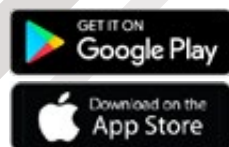

PC software for PowerFT line, configure all features, create and edit tunes, view Datalogger and Update ECU software and firmware

- Customizable table scaling and live cell tuning
- Fuel tables in ms, %VE (volumetric efficiency), %DC (duty cycle) and Fuel Flow (lb/hr, gpm or cc/min)
- Advanced time based controls with log and tune comparison tool
- Pro-Nitrous graphical representation
- Previous generation ECU tune converter to PowerFT line
- Specific tables import tool from other tunes
- Map and configurations backup
- Download new software online FREE and update ECU to stay up to date with all new features

DATALOGGER

- PowerFT line internal datalogger data download and analysis
- Log files comparison feature
- Mathematic channels to improve log analysis
- Overlay feature allows the customer to easily modify the cell that is used on the log file for Fuel, Timing, and Pro-Nitrous tables
- O2 Correction Overlay now allows the user to easily update their fuel map by applying the O2 closed loop corrections that were present in a log file
- Data export in CSV to embed in video or analysis on other software
- Fuel and ignition tables overlay feature for quicker tuning
- Improved log visualization with different background colors
- New mouse cursor for Datalogger
- RPM timeline for easier data analysis

APP DATALOGGER

- The FuelTech Datalogger application is a log file viewer for your phone or tablet to the PowerFT line
- With it, you can simultaneously view up to 4 recorded channels, allowing a quick data analysis.
- The status events are also available through the application, allowing you to easily check for errors while recording the log.

FuelTech

CONTROLLERS

Advanced electronic controllers, high current injector drivers, high power coil drivers, gear shift controllers, boost controllers.

With 10ft blank harness: #2628

Update your BoostController2 with USB-CAN Converter¹

BOOSTCONTROLLER2

Multi-stage Boost Controller with dual ramp per stage

- 16x2 characters OLED display and buttons that allow programming directly on the unit. No computer needed
- Active boost control through wastegate pressure management
- Up to 6 stages of boost and 1 launch stage
- For drag racing, circuit and street cars
- Dual boost ramp control per stage
- Burnout mode (fixed boost for burnout)
- 3 modes of adjustment:
 - Time and pressure
 - Time and Ramp
 - Ramp and Pressure

¹ FuelTech USB-CAN Converter needed (sold separately)

PEAKANDHOLD

4-channel low impedance injectors driver unit

- Current control driver for low impedance injectors
- 4-channel low impedance injectors driver unit
 - Available in three current versions:
 - 2A/0.5A
 - 4A/1A
 - 8A/2A

SWITCHPANEL

Keypad with configurable buttons and multicolor backlight

- Supply Voltage: 12-24Vdc
- Communication BUS: FTCAN 2.0
- IP67 protection against water and dust
- Include predefined and blank stickers so you can make your own IDs.
- Multicolor LED backlight that varies according to the programmed function.
- Reallocate up to 4, 5 or 8 PowerFT ECU inputs to extra sensors or functions, allowing you to expand your project without having to purchase more devices with more inputs.
- The unit has screws in the back, allowing an easy and discreet installation into the dashboard, making your project even more professional.
- Compatible with all the features in the PowerFT line.

SwitchPanel-8: #0170

SwitchPanel-8 mini: #0302

SwitchPanel-5 mini: #0301

SwitchPanel-4 mini: #0300

With 10ft blank harness: #2647

Update your GearController with USB-CAN Converter¹

GEARCONTROLLER

Active traction control and power-shift function

- 16x2 characters OLED display and buttons that allow programming directly on the unit. No computer needed
- Active traction control by wheel speed (compatible only with FT350, FT400 and PowerFT line)
- Retards ignition timing to control power on the wheels and cuts ignition on extreme situations
- Full throttle gear change with no clutch use, keeping constant torque and reducing time under no acceleration (power-shift function)²
- Individual gear cut time per shift
- Compatible with stock shift levers (contact us to check compatibility prior to acquisition)

¹ FuelTech USB-CAN Converter needed (sold separately)

² This feature is only compatible with dog engagement equipped gearboxes

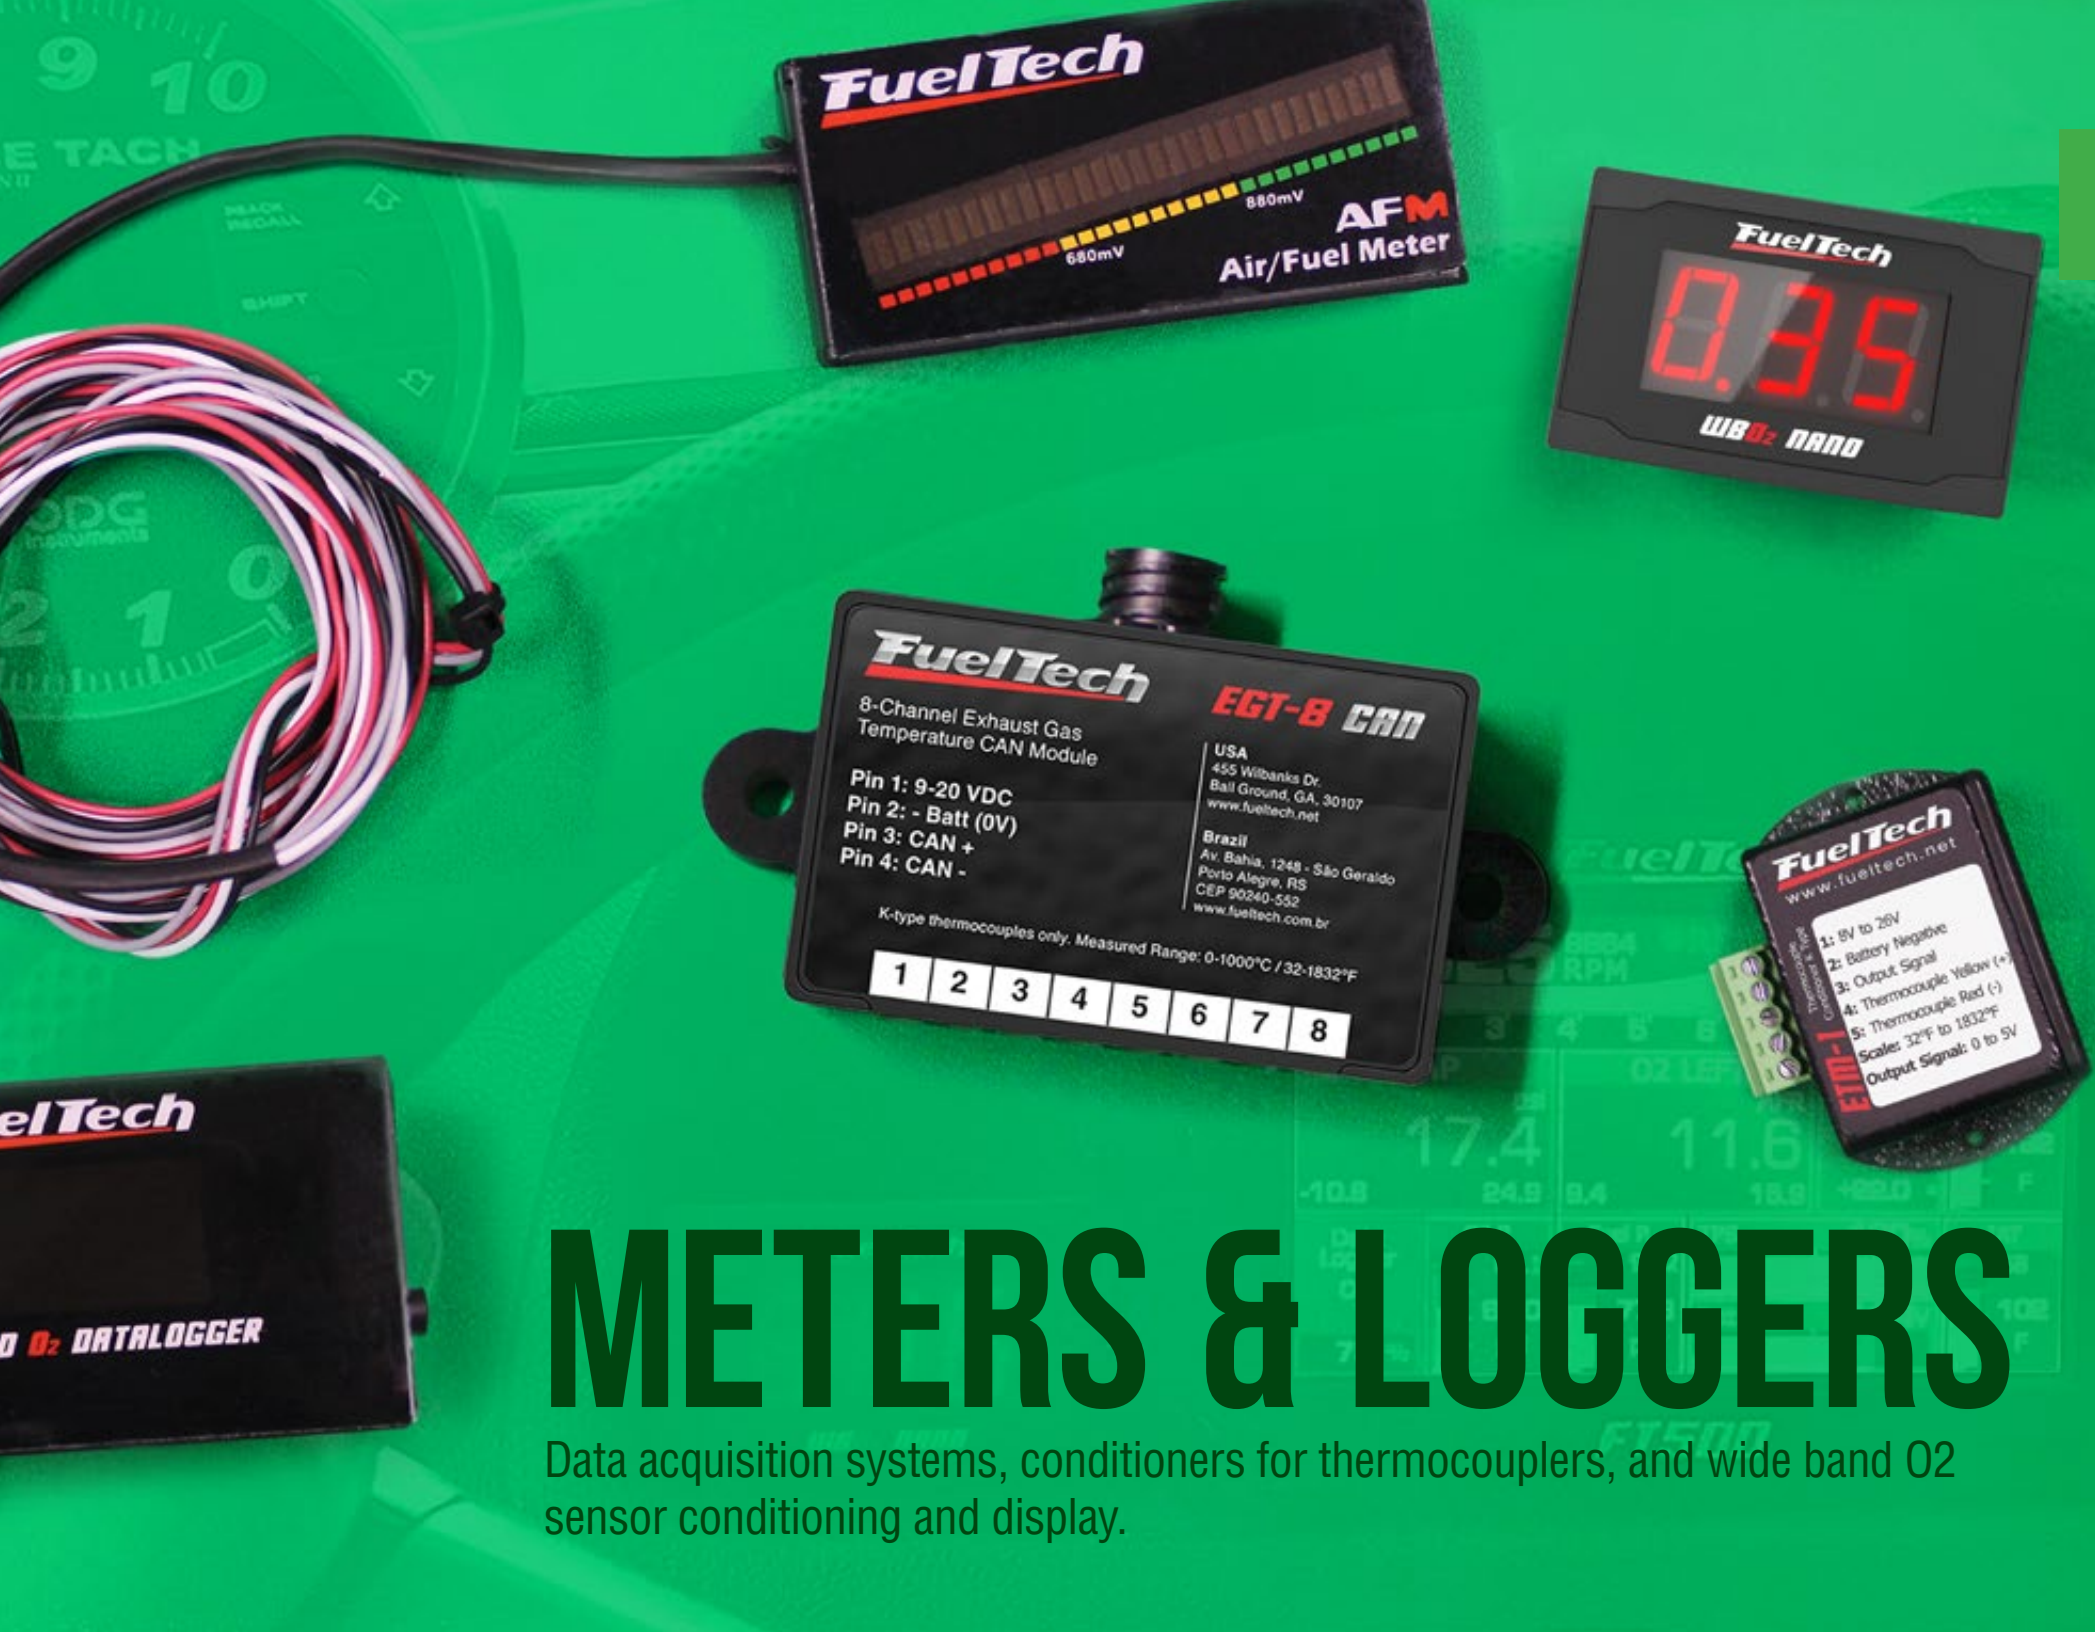

M10 x 1.25:	#3677
M10 x 1.50:	#5744
M12 x 1.50:	#3676
M12 x 1.75:	#4449
3/8"-24 UNF:	#3678

SHIFTKNOB

Shift Knob w/ Strain Gauge Sensor

- Designed to use with FuelTech FT600 or GearController to perform powershifts¹
- Detects knob deformation to cut the ignition
- H-pattern, sequential or inline application
- CNC machined
- Available in 5 different threads:
 - M10 x 1.25
 - M10 x 1.50
 - M12 x 1.50
 - M12 x 1.75
 - 3/8"-24 UNF

¹ GearController: only compatible with dog engagement equipped gearboxes (Liberty Pro Shift, Liberty Face Plate, etc). Synchro gearboxes are not compatible with GearController.

METERS & LOGGERS

Data acquisition systems, conditioners for thermocouples, and wide band O2 sensor conditioning and display.

Without Harness: #3841
With 10ft blank harness: #3840

- Replaces WB-O2 Meter Slim

WB02 NANO

Wideband O2 sensor conditioner^{1 2}

- Waterproof (IP67 Certified)
- Easy viewing and small size
- Extended reading scale 0.35 Lambda and up (2.24 AFR Alcohol, 5.15 Gasoline)
- CAN communication 2.0: sends the O2 reading via CAN to the ECU, freeing up the analog inputs
- Allows several conditioners connected to the FTCAN 2.0 network
- Automatic CAN network setup
- 0-5V analog output for connection with stand alone ECU or external datalogger
- Bosch amplification and control circuit

¹ Sensor not included
² Compatible with O2 sensor Bosch #0965

With 8.2ft blank harness: #2651

WB02 DATALOGGER

6 channel data acquisition system with integrated wideband O2 display and conditioner¹

- 6 recording channels: lambda (internal), RPM and 4 analog inputs (0-5v)
- Native high speed 2.0 USB connection, with no serial adapter required
- Up to 100hz of sampling rate
- Up to 7 hours of recording (on the lower sample rate)

With blank harness: #4060

Without Harness: #2630

Dual Channel w/o harness: #3398
Dual Channel w/8ft harness: #3341

EGT-8 CAN

8-channel conditioner for Type K¹ thermocouple with CAN communication

- Conditioner for Type K thermocouple
- 8-channel conditioner for Type K thermocouple with CAN communication
- Extended reading: 32°F to 1832°F
- CAN network communication for PowerFT ECU line, no analog input needed on your ECU
- Any temperature sensing, i.e., exhaust, intake, oil

¹ Thermocouple not included

ETM-1

Thermocouple conditioner type K¹

- Output signal: 0-5V
- 8V to 26V power supply
- Single channel
- For PowerFT line or external Datalogger
- Extended reading: 32°F to 1832°F
- Any temperature sensing, i.e., exhaust, intake, oil

¹ Thermocouple not included

ALCOHOL O2

High-end O2 sensor conditioner for Alcohol^{1 2}

- High precision and speed equipment that uses a special O2 sensor conditioner from NTK laboratories or Bosch LSU 4.2 (w/ adapter sold separately)
- Extremely rich air/fuel ratio readings: from 0.30 Lambda (1.94 AFR Alcohol)
- 0-5V analog output for connection with stand alone ECU or external datalogger
- CAN communication with FT500 and FT600

¹ Sensor not included
² Compatible with O2 sensor NTK #0011

IGNITION

High power CDI and inductive ignition modules.

The FuelTech FTSPARK is an extremely high energy Capacitive Discharge Ignition (CDI) system designed to meet the highest spark requirements for racing.

- Extreme performance applications
- 4 Versions: 1, 4, 6, and 8 coil(s)
- Configurable 600mJ energy
- Aluminum housing
- Advanced diagnosis through CAN Bus network
- Single wire triggering mode by Serial bus (1 wire) to PowerFT ECU line or traditional one trigger per channel
- Automotive connector with gold-plated terminals.

SPARKPRO

High energy inductive ignition

- Versions from 1 to 8 ignition outputs
- High voltage at the coil's primary: up to 430V
- Compatible with any programmable ECU that has dwell control

Bobina Racing CDI: #5218

CDI RACING COIL

Ignition Coil made to be used with our FuelTech FTSPARK

- Use with individual coil per cylinder and also rotary applications
- 125 Amps of current
- Best used with alcohol and nitromethane
- Only compatible with FuelTech FTSPARK

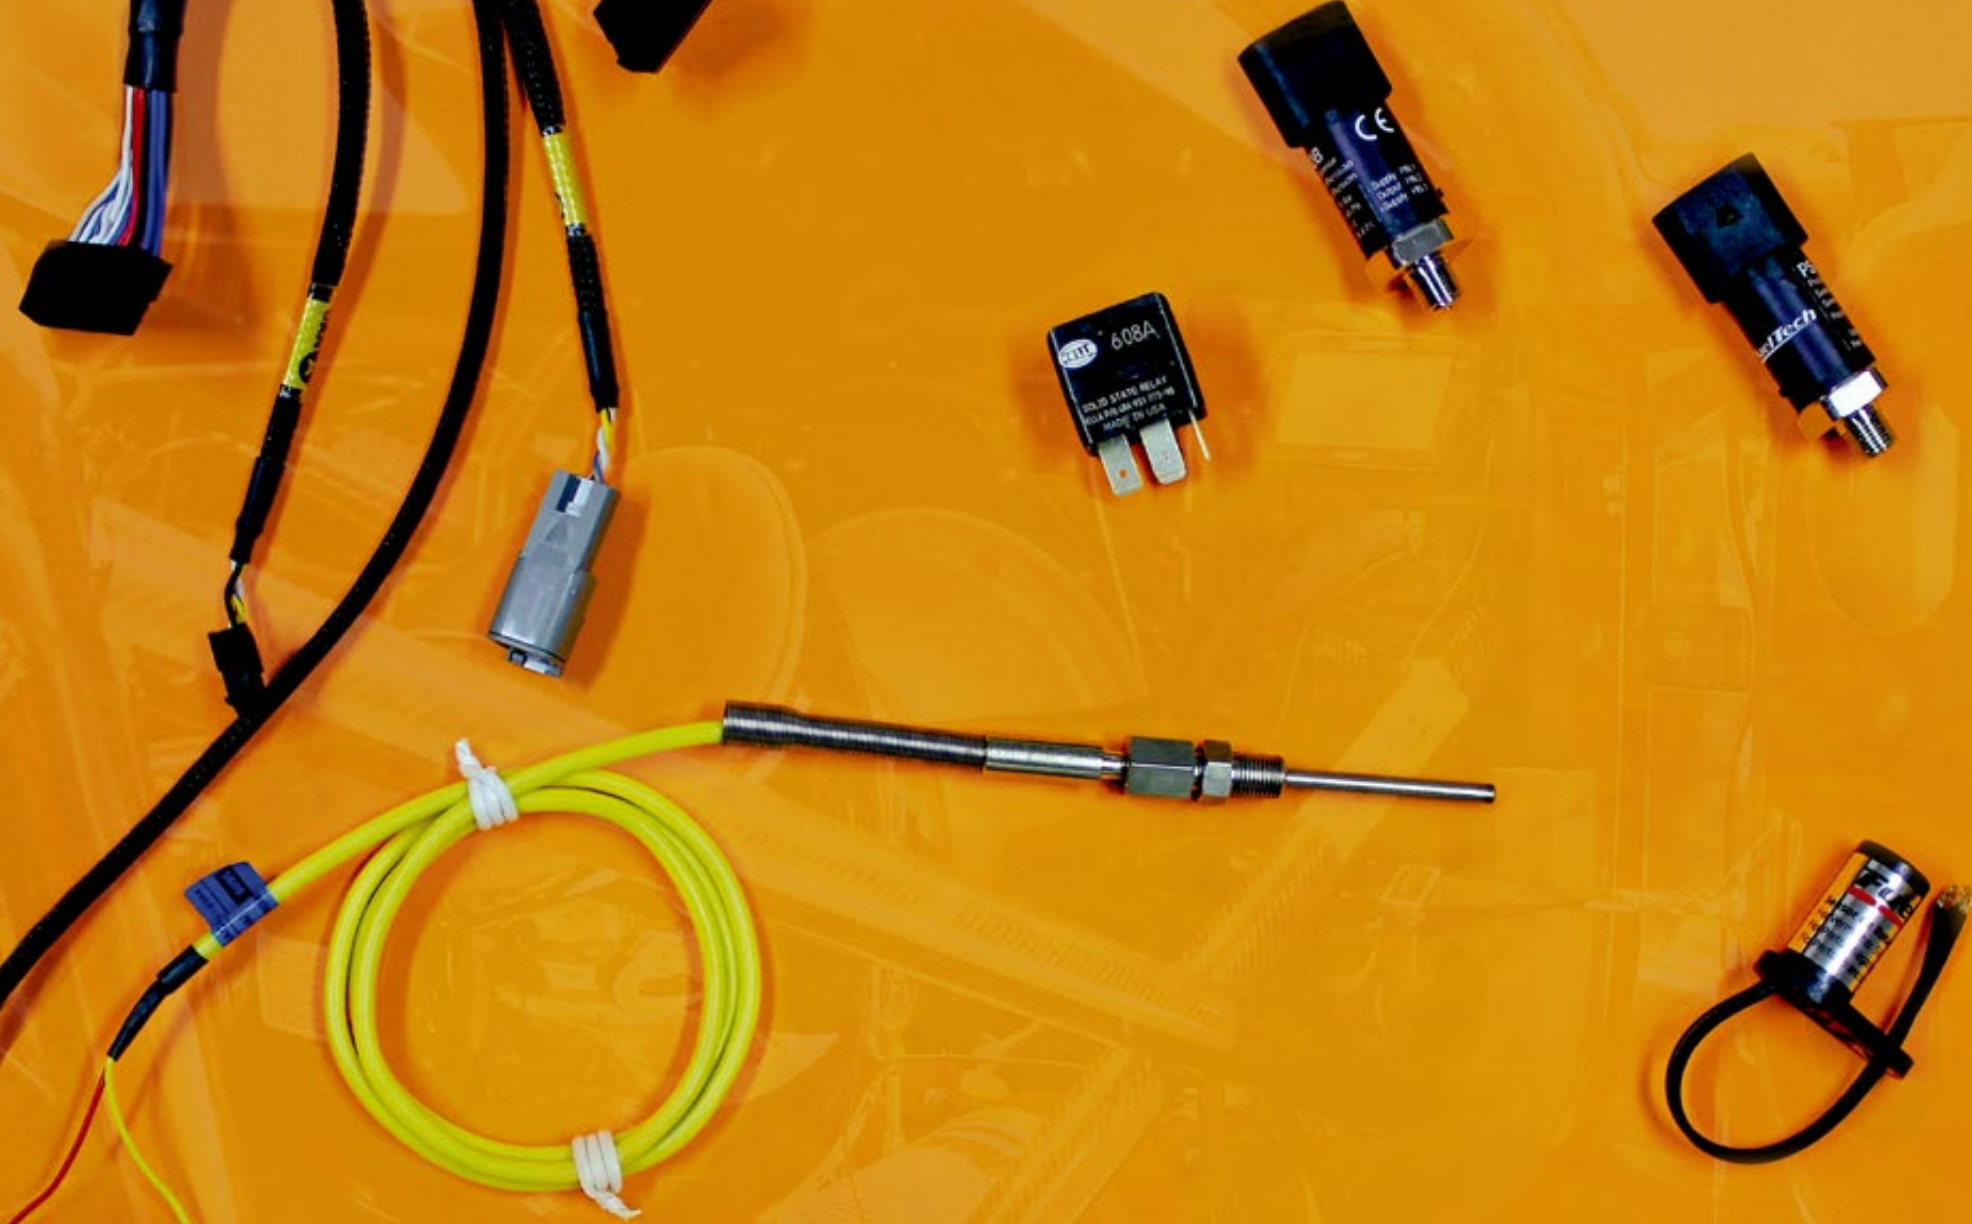

Bobina Smart Coil: #5632

SMART COIL

FuelTech Smart Coil with built-in igniter

- 175mJ @ 9ms Dwell and 14V
- High spark discharge duration
- For direct connection to the ECU's output with no need for external igniters
- Recommended for sequential ignition and individual coil per cylinder applications

SENSORS & ACCESSORIES

Sensors and accessories to read all kinds of data, from the engine's temperature to the suspension travel.

PS-150 (150psi):	#0020
PS-300 (300psi):	#0021
PS-500 (500psi):	#0217
PS-1500 (1500psi):	#0022
PS-3000 (3000psi):	#0220
PS-10B (145psi):	#0694

Pressure Sensors

High precision sensors to read pressure of any kind of fluid or gas on the engine

- Reads pressure on all kinds of fluid or gas (oil, fuel, water, boost, exhaust back pressure, etc)
- Output signal: 0.5-4.5V¹ or 1-5V²
- Feed voltage: 5V¹ or 12V²
- Versions: 0-150psi, 0-300psi, 0-1500psi, and 0-10bar
- PS-150, PS-300 and PS-1500 are compatible with PowerFT line
- PS-10B is compatible with all the FT products

¹ Values for PS-150, PS-300, and PS-1500

² Values for PS-10B

Wideband O2 Sensor: #0965

Wideband O2 Sensor

Compatible with any FuelTech wide band conditioner (WB-O2 Nano, Alcohol O2¹)

- Can not be used with leaded fuel, diesel or 2 stroke engines. The sensors life span will be drastically reduced or it will be quickly damaged
- Sensor thread: M18 x 1.5mm

¹ Must use adapter. Sold separately.

Alcohol Wideband O2 Sensor: #0011

Alcohol Wideband O2 Sensor

Wideband sensor designed for high accuracy and low AFR

- Must be used with FuelTech Alcohol O2 wideband signal conditioner
- Not compatible with FuelTech WB-O2 Nano
- Sensor thread: M18 x 1.5mm
- Wrench size: 22mm

Códe: #5776

FuelTech Emblem

- Chrome FuelTech logo
- Automotive 3M double-sided tape
- Dimensions: 4.56" (116mm) x 1.3" (33mm) x 0.18" (4,5mm)

4 inches version: #0209
8 inches version: #0211

Suspension Travel Sensor

The best way of monitoring your vehicle's suspension and body movements

- Available in versions of 4 and 8 inches of travel
- Can be used with any FuelTech PowerFT ECU
- 4" Travel Sensor:
 - Total Travel: 4
 - Length Closed: 9"
 - Length Extended: 13"
 - Mounting: 5mm Heim joints
 - Cable Length: 41"
- 8" Travel Sensor:
 - Total Travel: 8"
 - Length Closed: 13"
 - Length Extended: 21"
 - Mounting: 5mm Heim joints
 - Cable Length: 41"
- Voltage/Output:
 - Supply voltage: 5V
 - Signal Output: 0.5V - 4.5V

Code: #5789

G-Force Long Shifter

- Shifter lever with the GearController sensor already installed
- For use with G Force long style shifter transmissions

Pan Vacuum Sensor: #0031

5/16-24": #0025
3/8-24": #0026

Hall Effect RPM/Speed Sensor: #0083

Spark Plug Gapper: #0309

Pan Vacuum Sensor

Used to read positive or negative pressure on the oil pan

- Signal output: 0.5 - 4.5V
- Sensor thread: 1/8" NPT
- Reading range: -15psi to +15psi

Driveshaft Sensor with Bracket

Used to read driveshaft RPM and vehicle speed signal on RWD vehicles

- Non-magnetic driveshaft sensor
- Available in 5/16-24" and 3/8-24" thread sizes
- Connector and pigtail included
- 125" long from end of sensor
- Used with magnetic collars - 8 magnet split collar is recommended

Hall Effect RPM/Speed Sensor

Used to read crank, cam, wheel, and driveshaft speed

- Compatible with PowerFT ECUs and GearController

Spark Plug Gapper

Save time and precisely gap your spark plugs with our new billet spark plug gapping tool.

- The FuelTech spark plug gapper is recommended for the adjustment of the distance between the center and ground electrodes
- Sturdy tool with threaded adjustment and standard fitting for spark plugs
- Hardened steel grip and thread ensuring high resistance and durability
- Black anodized aluminum body with engraved FuelTech logos

MAIN HARNESS	
	Code
V8 PRO500 - 8 injectors	4769
LS FT500	0063
V8 PRO600	0076

Plug and Play Harnesses

Complete, ready-to-install wiring harnesses for fast and painless installations

- High quality, high durability relays
- Connector for PowerFT line ECUs
- High precision, detailing and fabrication standards
- Available in 8 or 16 injectors configuration
- The PRO600 Harness is a modular harness and by using the appropriate adapter harnesses you can use it for almost any V8 application
- Check out www.fueltech.net for our latest list of harness offerings

ADD-ON HARNESS			
	Code		Code
PRO600 Secondary Injector	0077	Nano to Alcohol O2 Adapter ¹	4769
PRO600 Smart Coil	0108	Bosch to NTK Adapter ²	0063
PRO600 FTSPARK-1	0173	LS EV1 Injector	0064
PRO600 FTSPARK-8	0142		

¹ Required when using Alcohol O2 w/ PRO600
² Required when using Alcohol O2 & NTK sensor w/ PRO600

Connector Kits

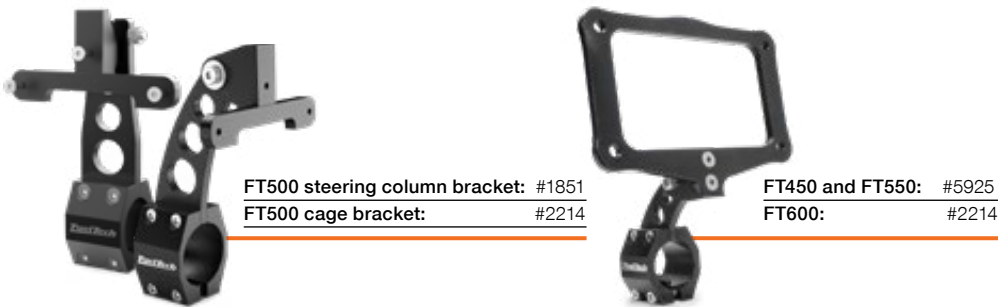

- Recommended for those who have upgraded to a new ECU and want to modify their existing harness for the new connectors.

	Code
FT450 Connector Kit	5719
FT550 Connector Kit	5720
FT600 Connector Kit	4509

Adapter Harnesses

- Plug and play adapter harnesses are the fastest way of using a ew ECU on an existing installation.

	Code
FT200, FT250, FT300, FT350, FT400 to FT450	5634
FT200, FT250, FT300, FT350, FT400 to FT450 and WBO2 Nano	5767
FT400 to FT550	5635
FT500 to FT550	5636
FT500 to FT600	4005

ECU mounting brackets

- Extremely lightweight and durable
- Manufactured in billet aluminum CNC machined
- Available in black

Dash Mount Panels

Perfect finishing for your vehicle.
Can be cut to any shape of dashboard cluster

- Made from high quality ABS
- Black finishing, allowing painting and/or wrapping
- Up to FT500: 17.7" x 11.8" x 1.3" / 450mm x 300mm x 33.1mm
- FT450 and FT500: 17.7" x 11.8" x 1.5" / 450 x 300 x 38,5mm
- FT600: 17.7" x 11.8" x 1.7" / 450mm x 300mm x 42.6mm

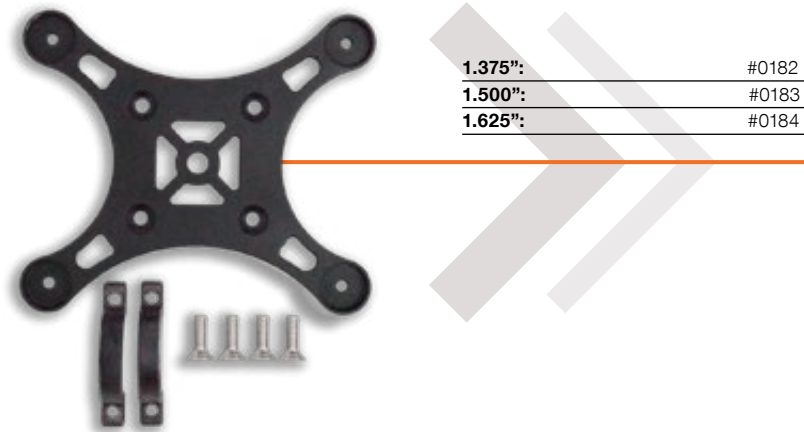

¹ For BoostController2, GearController, FT350, FT400 and FT500

FuelTech CDI Coil Bracket Kit

Use for up to 4 CDI Racing Ignition Coils¹

- Bracket kit designed to mount 4 FuelTech CDI Coils
- Made from lightweight billet aluminum, only 13.1 oz
- Includes (4) 1/4" socket head cap screws to mount the coils to the bracket
- (4) 1/4" threads in the back, front, and bottom for mounting to the chassis

¹ CDI Racing Ignition Coil not included

FTSPARK Mounting Bracket

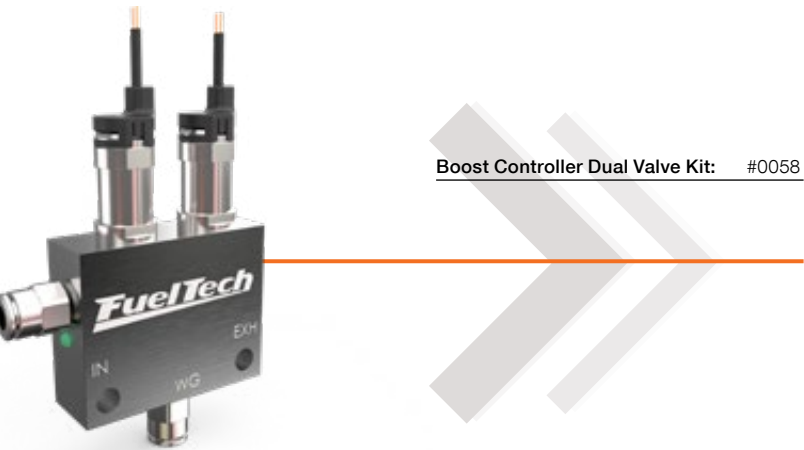

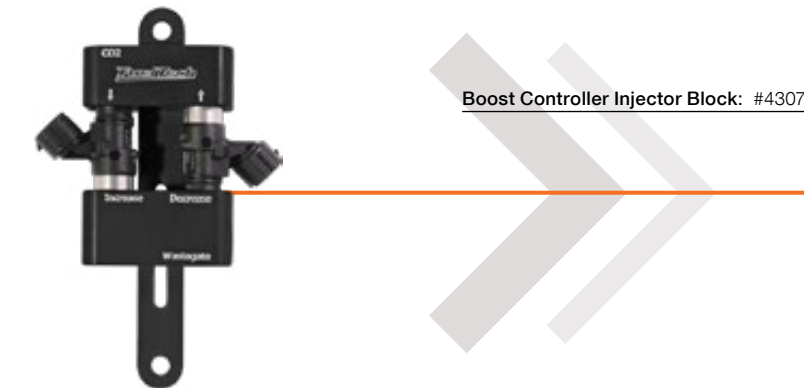

- Simplify installation of your FTSPARK with our chassis mounting bracket.
- Available sizes: 1.375", 1.500" and 1.625"
- New design allows mounting it horizontally or vertically

FT Boost Controller Injector Block

Fuel injector support block¹ used with the integrated wastegate boost control function of the PowerFT line ECUs²

- Rubber mount kit included (2 rubber mounts, 2 washers, 4 nuts)
- Must be used with high impedance and high flow injectors (above 50lb/hr). For better efficiency, the Bosch 170lb/hr (0280158827) and Bosch 210lb/hr (0280158821) injectors are recommended

¹ Injectors not included.
² Not compatible with BoostController and BoostController2 units. Use only with PowerFT ECUs.

Boost Controller Dual Valve Kit

Dual valve block for PowerFT ECU integrated boost controller

- Suitable for use with CO2 or manifold pressure
- Precise wastegate pressure control
- Valves support up to 150psi
- Lightweight aluminum valve block
- Compact design for tight engine bays
- High reliability

FT APPAREL

Hoodies, shirts, caps, beanies and much more for you to wear your passion for motorsport in the highest quality.
